DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6, 8, 9, and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Robertson et al.

The Robertson reference discloses a substance delivery device comprising a support frame with two resilient arms 11 which are capable of receiving and releasing a substance delivery means 15. Regarding claims 2-4, see col. 3, lines 28-34. Regarding claim 5, note that the cylindrical surface of means 15 are considered "rounded". Regarding claim 6, as the means is at least partially rubber (a flexible material), it is considered flexibly attached to the arms. Regarding claim 14, the device further includes a locator (the thread shown in Figure 1).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 10-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Robertson in view of Pryor et al.

The Robertson reference discloses a device as discussed supra, but remains silent as to the structural details of the IUD in the device. However, attention is directed to the Pryor device, which discloses an IUD made at least partially from nylon (see column 2, lines 20-25 having biased arms as claimed (see column 2, lines 32-56). It would have been obvious to one of ordinary skill in the art at the time the invention was made to select the use of an IUD made from nylon having biased arms in the Robertson device (if not already) in view of the teachings of Pryor, wherein so doing would amount to mere selection of one functionally equivalent IUD out of the various types of known IUD's within the same art and the selection of any of these IUD's would work equally well in the Robertson device.

Allowable Subject Matter

Claim 7 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments regarding claims 1-6 and 8-14 are not persuasive. Applicant argues that the resilient arms 11 releasably receive the substance delivery means 15. However, as seen in Figure 1, the substance delivery means 15 is at least

Art Unit: 3751

partially received on the portions of arms 11 proximate where they attach to the base. Thus, it is the Examiner's position that the Robertson device reads on the broad claim language "resilient arm capable of receiving and releasing a substance delivery means...".

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
